

# Online Self Check-in Step by Step Guide

# Self check-in step by step guide

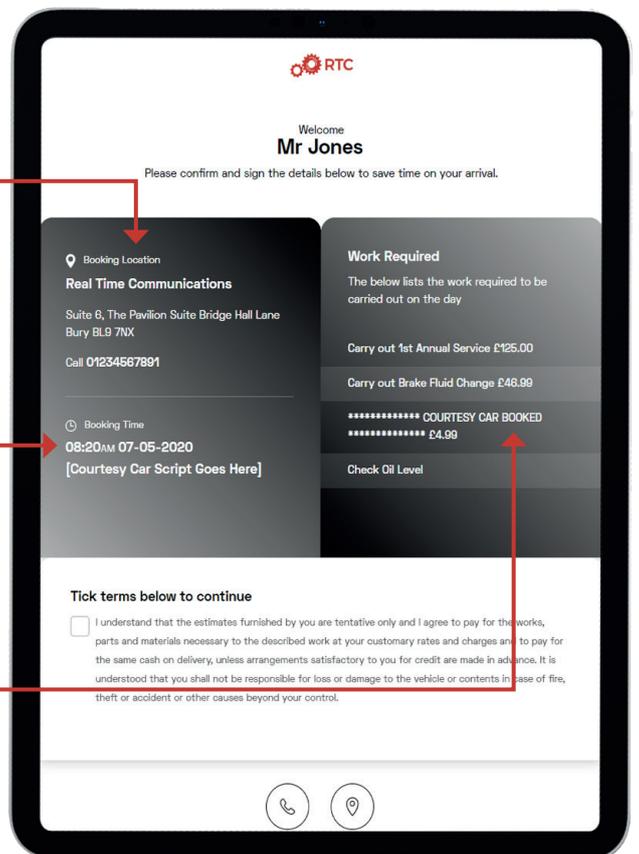

When the registration or postcode is successfully entered, it will pull through the existing booking made by the customer through the RTC Link system.

This information is collected from your dealer details configured within RTC under the Information button in Link system.

This information is collected from the customers booking. It will display slightly different narrative for collection, delivery and courtesy car customers.

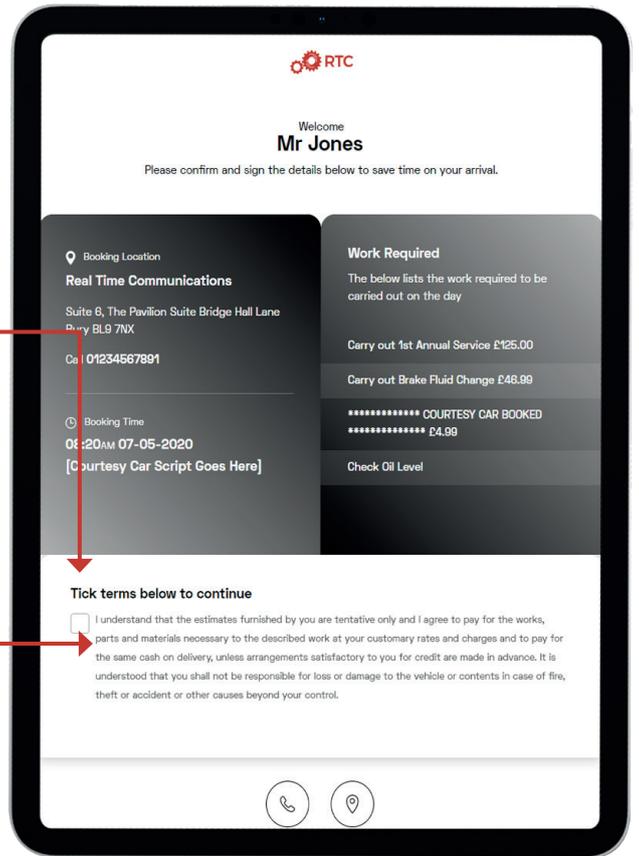

Prices can also be shown against the work required, as this is configurable.

The tick box has to be clicked to agree the terms and conditions.

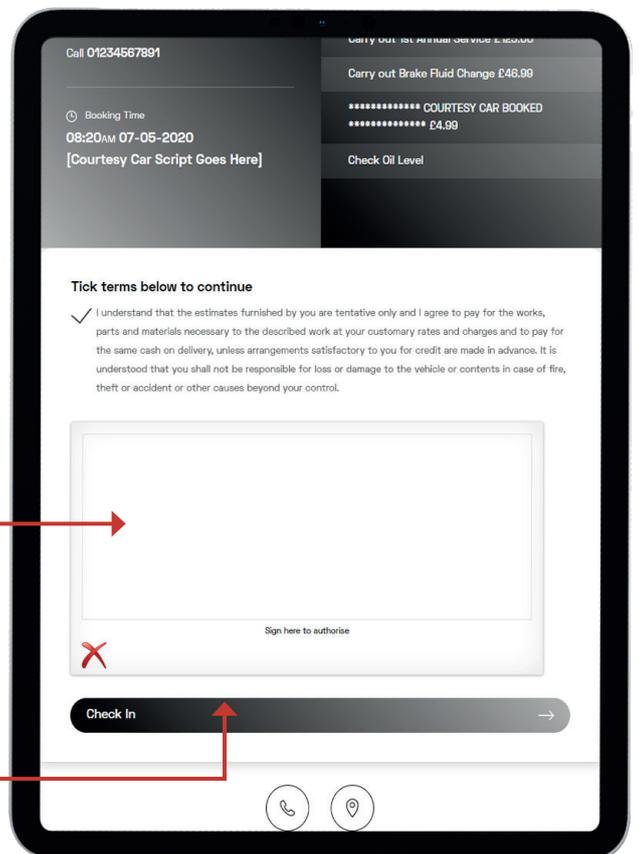

The terms box is configurable allowing individual dealer details.

This box is presented for the customer to sign.

Once clicked it will complete the remote check in and will update your Workshop Manager system with your configured status.

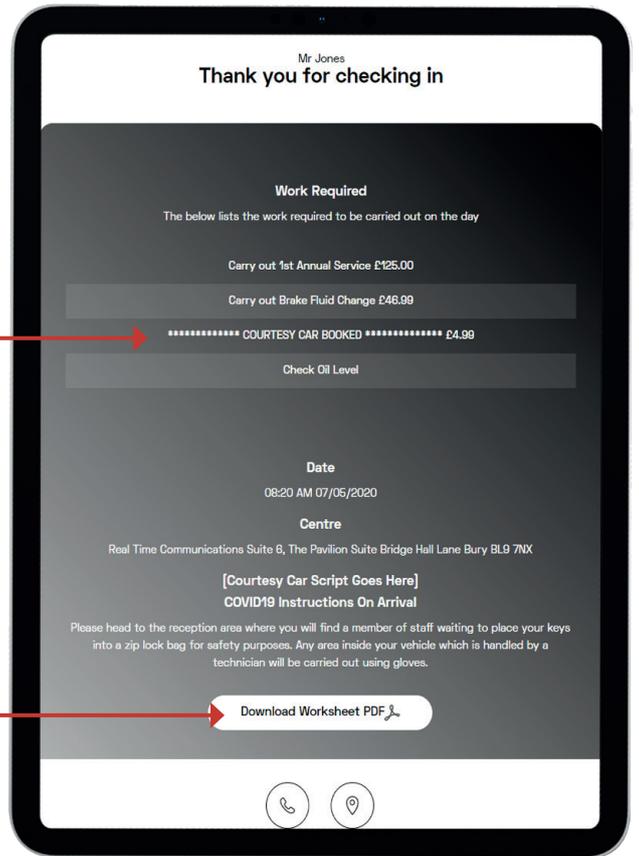

It will also generate and store the signed Job Card in your Documents Tab in Workshop Manager.

Confirmation window will contain slightly different narrative for customers taking advantage of collection and delivery or courtesy car facilities.

This is configurable and will print a copy of the worksheet/job card.

These two icons facilitate easy contact with your dealership and provide useful location details.
